

BASIC UNITS OF LIFE®

VITACRAVE

Stress Support • Mood Balance • Neurotransmitter Health

CELLCODE's VITACRAVE is a comprehensive stress management formula designed to help regulate cortisol levels, support neurotransmitter production, and promote emotional balance.* By combining key nutrients and herbal extracts, this formula supports both the physical and emotional aspects of stress for complete mind-body balance.*

Relora®, a proprietary blend of Magnolia and Phellodendron bark extracts, helps manage stress-related cortisol levels while reducing irritability and stress-induced cravings.* 5-HTP, a naturally occurring amino acid from Griffonia simplicifolia, supports serotonin production — helping promote calmness, resilience, and improved mood.*

Vitamin B6 plays a crucial role in neurotransmitter synthesis and energy metabolism, while Evodiamine supports metabolic health and thermogenic activity with capsaicin-like benefits.* Together, these ingredients work synergistically to maintain mental clarity, steady energy, and balanced emotional wellness under pressure.*

Whether you're managing the demands of a high-stress lifestyle, coping with fatigue, or seeking to stabilize mood and focus, VITACRAVE provides targeted nutrient support to help you stay centered, energized, and calm throughout the day.*

Benefits*

- **Supports Healthy Stress Response:** Helps regulate cortisol and promote balanced stress adaptation for calm focus.*
- **Promotes Mood Stability:** Provides 5-HTP and vitamin B6 to support serotonin production and neurotransmitter balance.*
- **Encourages Emotional Well-being:** Reduces stress-related irritability and promotes relaxation without drowsiness.*
- **Supports Healthy Metabolism:** Features Evodiamine for thermogenic and metabolic support during stress.*
- **Reduces Stress-Related Cravings:** Helps manage emotional eating and promotes balanced appetite under stress.*
