

BASIC UNITS OF LIFE®

# WHEY PROTEIN

Muscle Recovery • Metabolic Support • Cellular Strength

CELLCODE's WHEY PROTEIN is a clean, grass-fed protein powder formulated to support lean body composition, muscle repair, and overall vitality.\* Sourced exclusively from New Zealand grass-fed cows raised on pesticide-free, non-GMO pastures, this premium whey protein delivers complete, high-quality nutrition with exceptional purity and taste.\*

Protein is the foundation of human structure and function — essential for the growth, repair, and maintenance of muscles, bones, skin, and connective tissue.\* CELLCODE Whey Protein provides all nine essential amino acids, including a rich concentration of branched-chain amino acids (BCAAs) such as leucine, isoleucine, and valine, which are key to supporting \*muscle synthesis and recovery.

Naturally high in cysteine, whey helps promote the body's production of glutathione, one of the most powerful internal antioxidants that protects against oxidative stress and supports immune health.\* Unlike conventional whey products, CELLCODE Whey Protein is soy-free, hormone-free, antibiotic-free, and instantized with non-GMO sunflower lecithin for smooth blending and superior digestibility.\*

With a clean macronutrient profile, creamy texture, and delicious natural flavors, CELLCODE Whey Protein is ideal for anyone looking to nourish recovery, support healthy metabolism, and maintain strength at the cellular level.\*

## Benefits\*

- **Supports Lean Muscle and Recovery:** Promotes muscle repair, strength, and growth with a full spectrum of essential amino acids.\*
- **Enhances Satiety and Weight Management:** Supports fullness between meals and contributes to healthy body composition.\*
- **Promotes Healthy Glucose Metabolism:** Aids in balanced blood sugar regulation and energy production.\*
- **Supports Glutathione Production:** Rich in cysteine to promote the body's natural antioxidant defense system.\*
- **Nourishes Overall Vitality:** Provides foundational support for tissues, hormones, and enzymes throughout the body.\*

## Highlights

- Grass-fed whey protein from cows grazing on pesticide-free, non-GMO New Zealand pastures\*
- Free from hormones, antibiotics, and grains\*
- Instantized with sunflower lecithin for easy mixing and smooth texture (soy-free, non-GMO)\*
- No artificial sweeteners, sucrose, or fructose\*
- Available in chocolate, vanilla, and unflavored options\*
- Gluten-free, non-GMO, hormone-free, and antibiotic-free\*

## Recommended Use

Mix one scoop (30 g) in 8 oz of water or beverage of choice daily, or as directed by your healthcare provider. For best results, consume within 30 minutes after exercise or between meals as a protein-rich snack.

Consult with your health-care practitioner about your specific circumstances and any questions you may have about this product.
